SURESH T R
Full Stack Web Developer

CAREER OBJECTIVE

A Passionate Web Developer With Over 4 Years Of Experience. Experienced With All Stages Of The Development Cycle For Dynamic Web Projects.. Looking to leverage my knowledge and experience into a role as Full Stack Web Developer..

PROFESSIONAL EXPERIENCE

November 2020 – Present
Web Developer
Wipro – Levi's

Managing multiple Web Applications for Levi's based on the input from IT Director.

- Built Web Application from scratch which includes libraries like Three JS for 3D along with Textures, Ag-Grid for complex tables and so on.
- We were having different version for a single app like web version, iOS version, mac version and so on.
- As each and every application were connected in some way or the other way round, having the good architecture was must.
- Along with building different types of Applications from scratch we also had to maintain and enhance the existing Web Application.
- Used to work on Rest API and Graph QL based on the requirements.
- Most of the time I spent working on Vue JS in this project, but as I used to work under Levi's IT Directors, I had to be flexible working on different technologies like CI/CD pipeline, Javen, Python, React JS, node JS etc.

Mar 2018 – October 2020
Web Developer
Wipro - Johnson & Johnson

- I used to work on React JS in Neptune-Planet 9 tool
- Along with the frontend I used to handle NodeJS and PostgreSQL.
- Modifying different CSS based on the input from team lead, along with creating few utils using Python to speed up the process like finding page numbers for multiple files.
- Automating boring stuff it can be either finding page numbers or to delete specific list of files or uploading files based on conditions.
- As the client company is related to pharmaceutical, there used to be large team for testing, development, reviewing and so on, being a team player was challenging in the beginning days, later I proved myself that I can be a team player.
